## Workshop on "Awareness Program about IPR" on the Occasion of World IP Day

Dear Students and Faculty Members,

We are pleased to announce a workshop on "Awareness Program about Intellectual Property Rights (IPR)" to be held on 26/04/2022 at 3.00pm to 4.00pm in Dr. APJ Abdul Kalam Seminar Hall. This workshop is being organized in celebration of the World IP Day, which is observed on April 26th every year.

The workshop aims to create awareness about different forms of intellectual property, such as patents, trademarks, copyrights, and trade secrets. It will cover topics like the importance of IPR, the process of obtaining and protecting IPR, and the legal implications of IPR infringement. Expert speakers in the field of intellectual property will be delivering informative sessions, and there will be interactive discussions and case studies to facilitate a better understanding.

We urge all students and faculty members to participate in this workshop as it will provide valuable insights into the world of IPR and its impact on various industries. It is an excellent opportunity to enhance your knowledge and learn about the practical aspects of IPR.

We look forward to your active participation in this workshop and making it a successful event. Please confirm your attendance

Thank you.

#### II. ABSTRACT

In an era marked by the accelerated pace of life and an aging population, ensuring human safety has become a paramount concern. This report proposes the development of a cutting-edge Human Safety App, integrating real-time heart rate detection and fall detection functionalities. The primary objective is to provide immediate assistance in emergency situations, particularly for individuals susceptible to heart-related issues and falls.

The app leverages sensor technology, such as those embedded in smartphones and wearables, to continuously monitor the user's heart rate. Swift detection of irregularities in heart rate facilitates preventive healthcare, while advanced algorithms employing accelerometers and gyroscopes ensure the prompt identification of falls. The user-friendly interface ensures accessibility for users of all ages, fostering widespread adoption.

Critical to the app's efficacy is its seamless integration with emergency services, caregivers, and designated contacts. Additional features include location sharing and audio/video capabilities, enhancing the comprehensiveness of emergency responses. Addressing concerns of data privacy and security, stringent measures are implemented to safeguard sensitive health information.

Compatibility extends across a range of devices, from smartphones to smartwatches, ensuring versatility. Rigorous testing and validation procedures underscore the accuracy and reliability of the app's algorithms, with certifications obtained from relevant health and safety authorities.

Human Safety App represents a transformative approach to personal safety and healthcare. By combining advanced sensor technology with a user-centric design, the app stands poised to make a substantial impact on improving emergency response times and ultimately enhancing the overall safety and well-being of its users.

## 4. PROJECT DETAILS:

Safe Guard: A Comprehensive Safety and Health Monitoring App

### **Project Overview:**

Safe Guard is an advanced mobile application meticulously crafted to elevate personal safety through the fusion of cutting-edge heart rate monitoring, fall detection, and an intuitive user interface. Tailored for individuals susceptible to heart-related issues and falls, this app is envisioned to redefine the landscape of personal safety by integrating proactive health monitoring with seamless emergency response features.

#### **Project Objectives:**

#### 1. Real-Time Heart Rate Monitoring:

Employ sophisticated sensor technologies to enable continuous heart rate monitoring.

Implement algorithms to detect irregularities in heart rate, providing users with timely health insights.

#### 2. Fall Detection Precision:

Harness the power of accelerometers and gyroscopes to achieve highprecision fall detection.

Trigger instant alerts and emergency protocols in response to detected falls.

## 3. Intuitive User Interface Design:

Develop a visually appealing and user-friendly interface with a focus on simplicity and accessibility.

#### MINI PROJECT REPORT

Prioritize an intuitive design to enhance user engagement and facilitate easy navigation.

## 4. Emergency Response Integration:

Establish seamless connectivity with emergency services, caregivers, and designated contacts.

Integrate features like location sharing and audio/video communication to enhance emergency response efficacy.

#### 5. Privacy and Security Measures:

Implement robust encryption and privacy measures to safeguard user data.

Adhere to stringent privacy regulations and industry standards to ensure user trust.

#### **Technology Stack:**

**Frontend:** React Native for cross-platform development, ensuring a consistent and responsive UI.

Backend: Java server Faces

Database: SQL for efficient and secure data storage.

Sensors: Leverage device-specific sensors for heart rate

monitoring and fall detection.

Subject: Regarding Invitation for Engineers Day Celebration.

Respected Sir,

With reference to above subject, we are pleased to introduce ourselves as an emerging B. Tech College, offering courses for Mechanical, Civil, Electrical and Computer Engineering courses, those have been approved by AICTE New Delhi, DTE, DBATU Lonere, Dist.- Raigad.

We sincerely endeavor for giving comprehensive technical knowledge to our student, so that they can confidently withstand the competition prevailing in the market and that they could comply the industrial demand as well.

It gives us immense pleasure to invite you as a "Chief Guest" for Technical event in the occasion of "Engineers Day Celebration" on 15th September 2018. To address our Engineering students, your knowledge will be very much useful to our students and also encourages students to confidently make or build their currier. The schedule for Event would be on Saturday, 15/09/2018 from 10:00 am to 2:30 pm.

We are glad to invite you as a Chief Guest, on the behalf of our institute.

Thanking You.

(37) Abstract:

ABSTRACT [500] Our Invention Advanced Drone is a arising area of canny automated elevated which (UAV) research has shown fast improvement as of late and offers an extraordinary number of exploration challenges for computerized reasoning and information portrayal. Much past exploration has zeroed in on low-level control capacity fully intent on creating regulators which support the independent wip of a UAV starting with one way-point then onto the next. The most well-known nort of mission altuation includes putting struggle circumstances and are anticipated to assume progressively more significant parts in any future constantions. Ashate UAVs will assume a similarly significant part in common applications, there have become progressively more significant in late more complex UAV stages where the accentuation is put on improvement of savvy capacities and on capacities to collaborate with human administrators and extra mechanical stages. Center in research has moved from low-level control towards a blend of low-level and choice level control coordinated in refined programming structures.

(57) Abstract:

ABSTRACT [500] Our Invention ECO-FRIENDLY ELECTRICITY GENERATION AND NUMERICAL ANALYSIS VIA GYM EQUIPMENTS is a majority of recently developed technologies are fully dependent on electricity to function properly, hence the need for energy is rising daily. The development of humans has been greatly influenced by energy. The scientific community is turning its attention to renewable energy sources because conventional energy sources like coal, natural gas, and fossil fuels are finally running out. This study proposes a theoretical model of the Energy Generating Gyms System (EGGS), which will contribute its share to the renewable energy industry. People in today's society are concerned about their health and use gym equipment to practice activities that will help them reach their desired level of finess. In a gym, numerous machines are physically operated by users everting effort on the devices. The concept behind smart EGGS is that human energy used on gym equipment wishould be transformed into electrical energy. Smart EGGS will produce clean, sustainable, and renewable electrical energy. According to research for smart EGGS, people are also a source of renewable energy, and the chemical energy they possess can be turned into electrical energy. For the nations who are suffering from severe energy difficulties, EGGS will be tremendously helpful. The combined output of all the gym equipment will provide the necessary quantity of electrical energy for the equipment. It is possible to resell extra electrical energy to a utility.
